- Navreet has worked in the Financial Services, Manufacturing, Telecommunications, Petroleum, Distribution, Retail, Supply Chain and Utilities industries.
- Navreet is a Mechanical Engineer with an MBA in Finance and a Masters Degree in Marketing Management.

Key Career Accomplishments

- Managing and leading consulting projects for clients.
- Managed the design and execution of a comprehensive risk assessment to review changes being introduced by the implementation of a new Multi-Channel and Multi-Facility Supply Chain system at a Major Retailing Corporation in Canada.
- Lead a high level risk assessment of a utility company's (US) gain share arrangement for telecom and data services with a global telecom and technology service provider. Subsequently also managed an in-depth review of the various components of the gain share process to ensure compliance with the contract and determine cost competitiveness.
- Project Managed and Lead Cost Recovery Audits for a Global Petroleum Company.
- Managed Procure to Pay, Improper Payments and Inventory Risk Assessments for a global pharmaceutical corporation at locations in Canada and Europe. Reviewed Contracts with Suppliers to ensure that they conformed to Canadian and internal laws and regulations.
- Lead the development of a SOX compliant Procurement Model for a Global Real Estate corporation. The procurement model took into account unique business practices specific to construction contracts and vendor management.
- Managed Bill 198 / SOX project initiatives for several Canadian clients.
- Implemented a Risk Management approach, combining ERM and Bill 198 CEO / CFO requirements for reporting to the Audit Committee of Canada's Leading Retail Chain.
- Managed the implementation of an Enterprise Risk Management System at Canada's Leading Retail Chain. Implementation included developing and communicating control framework and incorporating it into Risk Assessment and Audit Process.
- Lead and managed independent reviews of the adequacy of Financial and Operational controls as they related to various business processes / audit entities within large Canadian Corporations. Assignments included review of contracts with Contract Manufacturers in North America and Europe.
- Lead Key Activity Based Costing and Management projects at a Major Canadian Bank. Implementation of key recommendations resulted in large savings of millions of dollars.
- Managed engineering projects for Multinational Trading Partners and developed and implemented marketing strategies for the introduction of new product lines within a large Trading Organization.
- Managed plant shut downs which involved monitoring and coordinating projects executed by special task forces, contractors and employees at a Major Refinery.
